CMPS 5433 – PARALLEL PROCESSING
Term Paper Information

Thursday, March 4  Term Paper Proposal Due
Tuesday, March 30  Term Paper Due
                  Email attachment to Dr. Halverson
Tuesday, April 6  Term Paper Presentations
Thursday, April 8 Term Paper Presentations

GENERAL INFORMATION
Each student is to write a paper discussing one of the following aspects of parallel computing. The paper must be supported by at least 3 research articles, copies of which must be provided to Dr. Halverson.

- A specific application to which parallel computing has been applied
- A developing parallel programming language, operating systems, or other tool being developed.
- Other topics can be suggested by the student for approval

FORMAT
Times New Roman 12-point font, 1 inch margins, single spaced. 5 – 7 pages. Must include at least 1 chart, diagram or table. Follow the department guidelines for a term/file paper for all other aspects.

PROPOSAL
The proposal should include the following:

- Your name
- Application
- Bibliography of 3 articles
- Brief summary of your paper (~100 words)

Duplicate topics will not be approved. First one turned in gets the topic.

PRESENTATION
Students will give presentations on March 6 & 8. All students should be prepared on March 6. The presentation should be between 10 & 15 minutes in length. Professionally developed slides are required.

CONTENT
Papers are expected to be well-written using correct grammar and spelling. All content is to be in the student’s own words, with proper quotations and citations utilized.
Students can find excellent information regarding the use of other materials and the avoidance of plagiarism at http://plagiarism.org/
